SECTION 7: Handling and storage

7.1 Precautions for safe handling

Handling in a well ventilated place. Wear suitable protective clothing. Avoid contact with skin and eyes. Avoid formation of dust and aerosols. Use non-sparking tools. Prevent fire caused by electrostatic discharge steam.

7.2 Conditions for safe storage, including any incompatibilities

Stored in places that are cool enough to prevent accidental ignition ... provide adequate ventilation ... locate ... storage area well away from areas of fire hazard ... must be kept apart from powerful oxidizing agents .

SECTION 8: Exposure controls/personal protection

8.3 Individual protection measures, such as personal protective equipment (PPE)

Eye/face protection

Wear tightly fitting safety goggles with side-shields conforming to EN 166(EU) or NIOSH (US).

Skin protection

Wear fire/flame resistant and impervious clothing. Handle with gloves. Gloves must be inspected prior to use. Wash and dry hands. The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it.

SECTION 12: Ecological information

12.1 Toxicity

- Toxicity to fish: no data available
- Toxicity to daphnia and other aquatic invertebrates: no data available
- Toxicity to algae: no data available
- Toxicity to microorganisms: no data available

12.2 Persistence and degradability

Using an aerobic dilution method and an adapted culture taken from a treatment plant, 50 ppm butyl benzoate was observed to biodegrade readily as 100% of added butyl benzoate degraded within one day(1). Using the standard BOD dilution method, butyl benzoate was found to have a 5-day theoretical BOD of 50% and a 30-day theoretical BOD of 73%(2).

12.3 Bioaccumulative potential

Based upon a reported water solubility of 59 mg/L(1), the BCF for butyl benzoate can be estimated to be 62 from a recommended regression-derived equation(2, SRC). This BCF value suggests that bioconcentration in aquatic organisms is not important(SRC).

12.4 Mobility in soil

A Koc of 125 was experimentally determined for butyl benzoate(1); this Koc value indicates high soil mobility(2).

12.5 Other adverse effects

no data available

SECTION 13: Disposal considerations

13.1 Disposal methods

Product

The material can be disposed of by removal to a licensed chemical destruction plant or by controlled incineration with flue gas scrubbing. Do not contaminate water, foodstuffs, feed or seed by storage or disposal. Do not discharge to sewer systems.

Contaminated packaging

Containers can be triply rinsed (or equivalent) and offered for recycling or reconditioning. Alternatively, the packaging can be punctured to make it unusable for other purposes and then be disposed of in a sanitary landfill. Controlled incineration with flue gas scrubbing is possible for combustible packaging materials.
