

# SAFETY DATA SHEETS

According to the UN GHS revision 9

Version: 1.2  
Creation Date: July 15, 2019  
Revision Date: August 08, 2025

## SECTION 1: Identification

### 1.1 GHS Product identifier

Product name Bis(2-Ethylhexyl) Tetrabromophthalate

### 1.2 Other means of identification

Product number SFRT111305-TO

Other names -

### 1.3 Recommended use of the chemical and restrictions on use

Identified uses For laboratory and Industrial use only.

Uses advised against no data available

### 1.4 Supplier's details

Company CATO Research Chemicals Inc.

Address 3/F,Building B,No.179 BASIGO, Guangpu Rd East,Huangpu Dist,Guangzhou

Telephone +86-20-81960175

### 1.5 Emergency phone number

Emergency phone number +86-20-81960175

Service hours 'Monday to Friday, 9am-5pm (Standard time zone: UTC/GMT +8 hours).

## SECTION 2: Hazard identification

### 2.1 Classification of the substance or mixture

Not classified.

### 2.2 GHS label elements, including precautionary statements

Pictogram(s) No symbol.

Signal word No signal word

Hazard statement(s) none

Precautionary statement(s)

Prevention none

Response none

Storage none

Disposal none

### 2.3 Other hazards which do not result in classification

no data available

## SECTION 3: Composition/information on ingredients

### 3.1 Substances

| Chemical name                         | Common names and synonyms             | CAS number | EC number | Concentration |
|---------------------------------------|---------------------------------------|------------|-----------|---------------|
| Bis(2-Ethylhexyl) Tetrabromophthalate | Bis(2-ethylhexyl) tetrabromophthalate | 26040-51-7 | 247-426-5 | 100%          |

## SECTION 4: First-aid measures

### 4.1 Description of necessary first-aid measures

If inhaled

Move the victim into fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration and consult a doctor immediately. Do not use mouth to mouth resuscitation if the victim ingested or inhaled the chemical.

Following skin contact

Take off contaminated clothing immediately. Wash off with soap and plenty of water. Consult a doctor.

Following eye contact

Rinse with pure water for at least 15 minutes. Consult a doctor.

**Following ingestion**

Rinse mouth with water. Do not induce vomiting. Never give anything by mouth to an unconscious person. Call a doctor or Poison Control Center immediately.

**4.2 Most important symptoms/effects, acute and delayed**

no data available

**4.3 Indication of immediate medical attention and special treatment needed, if necessary**

Immediate first aid: Ensure that adequate decontamination has been carried out. If patient is not breathing, start artificial respiration, preferably with a demand valve resuscitator, bag-valve-mask device, or pocket mask, as trained. Perform CPR if necessary. Immediately flush contaminated eyes with gently flowing water. Do not induce vomiting. If vomiting occurs, lean patient forward or place on the left side (head-down position, if possible) to maintain an open airway and prevent aspiration. Keep patient quiet and maintain normal body temperature. Obtain medical attention. Poisons A and B

---

**SECTION 5: Fire-fighting measures**

**5.1 Suitable extinguishing media**

Advice for Firefighters: Wear self contained breathing apparatus for fire fighting if necessary.

**5.2 Specific hazards arising from the chemical**

no data available

**5.3 Special protective actions for fire-fighters**

Wear self-contained breathing apparatus for firefighting if necessary.

---

**SECTION 6: Accidental release measures**

**6.1 Personal precautions, protective equipment and emergency procedures**

Avoid dust formation. Avoid breathing mist, gas or vapours. Avoid contacting with skin and eye. Use personal protective equipment. Wear chemical impermeable gloves. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak.

**6.2 Environmental precautions**

Prevent further spillage or leakage if it is safe to do so. Do not let the chemical enter drains. Discharge into the environment must be avoided.

**6.3 Methods and materials for containment and cleaning up**

Accidental Release Measures. Personal Precautions, Protective Equipment and Emergency Procedures: Use recommended personal protective equipment. Prevent the formation of dusts and mists. Adequate ventilation must be provided to ensure dusts or mists are not inhaled. Environmental Precautions: Material should not be allowed to enter the environment. Prevent further spillage or discharge into drains, if safe to do so. Methods and Materials for Containment and Cleaning Up: Contain the spill and then collect using non-combustible absorbent material (such as clay, diatomaceous earth, vermiculite or other appropriate material). Place material in a suitable, sealable container and then dispose according to local/national regulations and guidance.

---

**SECTION 7: Handling and storage**

**7.1 Precautions for safe handling**

Handling in a well ventilated place. Wear suitable protective clothing. Avoid contact with skin and eyes. Avoid formation of dust and aerosols. Use non-sparking tools. Prevent fire caused by electrostatic discharge steam.

**7.2 Conditions for safe storage, including any incompatibilities**

Conditions for Safe Storage, Including any Incompatibilities: Ensure container is kept securely closed before and after use. Keep in a well ventilated area and do not store with strong oxidizers or other incompatible materials. Store at 4 deg C.

---

**SECTION 8: Exposure controls/personal protection**

**8.1 Control parameters**

**Occupational Exposure limit values**

no data available

**Biological limit values**

no data available

**8.2 Appropriate engineering controls**

Ensure adequate ventilation. Handle in accordance with good industrial hygiene and safety practice. Set up emergency exits and the risk-elimination area.

**8.3 Individual protection measures, such as personal protective equipment (PPE)**

Eye/face protection

Wear tightly fitting safety goggles with side-shields conforming to EN 166(EU) or NIOSH (US).

**Skin protection**

Wear fire/flammable resistant and impervious clothing. Handle with gloves. Gloves must be inspected prior to use. Wash and dry hands. The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it.

**Respiratory protection**

If the exposure limits are exceeded, irritation or other symptoms are experienced, use a full-face respirator.

**Thermal hazards**

no data available

---

## SECTION 9: Physical and chemical properties and safety characteristics

|                                                          |                                                                                    |
|----------------------------------------------------------|------------------------------------------------------------------------------------|
| Physical state                                           | Liquid.                                                                            |
| Colour                                                   | No data.                                                                           |
| Odour                                                    | no data available                                                                  |
| Melting point/freezing point                             | -27 °C.                                                                            |
| Boiling point or initial boiling point and boiling range | >= 300 °C. Atm. press.:1 013 hPa.                                                  |
| Flammability                                             | no data available                                                                  |
| Lower and upper explosion limit/flammability limit       | no data available                                                                  |
| Flash point                                              | 207 °C. Atm. press.:1 013 hPa.                                                     |
| Auto-ignition temperature                                | 370 °C. Atm. press.:1 013 hPa.                                                     |
| Decomposition temperature                                | no data available                                                                  |
| pH                                                       | no data available                                                                  |
| Kinematic viscosity                                      | dynamic viscosity (in mPa s) = 2 036. Temperature:20°C. Remarks:Dynamic viscosity. |
| Solubility                                               | In water, 1.98X10 <sup>-9</sup> mg/L at 25 deg C (est)                             |
| Partition coefficient n-octanol/water                    | log Pow = 10.2. Temperature:25 °C.                                                 |
| Vapour pressure                                          | 0 Pa. Temperature:25 °C. Remarks:Modified Grain method.                            |
| Density and/or relative density                          | 1.541. Temperature:20 °C.                                                          |
| Relative vapour density                                  | no data available                                                                  |
| Particle characteristics                                 | no data available                                                                  |

---

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

no data available

### 10.2 Chemical stability

no data available

### 10.3 Possibility of hazardous reactions

no data available

### 10.4 Conditions to avoid

no data available

### 10.5 Incompatible materials

Incompatible Materials: Strong oxidizing agents.

### 10.6 Hazardous decomposition products

Special Hazards Arising from the Substance or Mixture: Carbon oxides, Hydrogen bromide

---

## SECTION 11: Toxicological information

### Acute toxicity

- Oral: LD50 - rat (male/female) - > 5 000 mg/kg bw.
- Inhalation: no data available
- Dermal: LD50 - rabbit (male/female) - > 2 000 mL/kg bw.

### Skin corrosion/irritation

no data available

### Serious eye damage/irritation

no data available

**Respiratory or skin sensitization**

no data available

**Germ cell mutagenicity**

no data available

**Carcinogenicity**

no data available

**Reproductive toxicity**

no data available

**STOT-single exposure**

no data available

**STOT-repeated exposure**

no data available

**Aspiration hazard**

no data available

---

## SECTION 12: Ecological information

### 12.1 Toxicity

- Toxicity to fish: LC50 - *Oncorhynchus mykiss* (previous name: *Salmo gairdneri*) - > 1 000 mg/L - 96 h.
- Toxicity to daphnia and other aquatic invertebrates: EC50 - *Daphnia magna* - > 10 mg/L - 48 h.
- Toxicity to algae: EC50 - *Desmodesmus subspicatus* (previous name: *Scenedesmus subspicatus*) - > 100 mg/L - 72 h.
- Toxicity to microorganisms: EC50 - activated sludge of a predominantly domestic sewage - > 1 000 mg/L - 3 h. Remarks:Respiration rate.

### 12.2 Persistence and degradability

no data available

### 12.3 Bioaccumulative potential

An estimated BCF of 13 was calculated in fish for bis(2-ethylhexyl) tetrabromophthalate(SRC), using an estimated log Kow of 11.95 and a regression-derived equation(1). According to a classification scheme(2), this BCF suggests the potential for bioconcentration in aquatic organisms is low(SRC). Fathead minnows (*Pimephales promelas* Rafinesque) were exposed to bis(2-ethylhexyl) tetrabromophthalate for 42 days (followed by 28 days depuration) in outdoor mesocosm ponds. The compound was detected in fish only on day 7 of the 70-day experiment and only in fish from one pond, indicating that it does not bioconcentrate(3).

### 12.4 Mobility in soil

Using a structure estimation method based on molecular connectivity indices(1), the Koc of bis(2-ethylhexyl) tetrabromophthalate can be estimated to be  $8.8 \times 10^5$ (SRC). According to a classification scheme(2), this estimated Koc value suggests that bis(2-ethylhexyl) tetrabromophthalate is expected to be immobile in soil. In a field study, the dissipation half-lives in suspended solids and sediment were reported as 25 and >200 days (actual estimated half-life in sediment based on data was 1330-17,280 days), respectively(3).

### 12.5 Other adverse effects

no data available

---

## SECTION 13: Disposal considerations

### 13.1 Disposal methods

**Product**

The material can be disposed of by removal to a licensed chemical destruction plant or by controlled incineration with flue gas scrubbing. Do not contaminate water, foodstuffs, feed or seed by storage or disposal. Do not discharge to sewer systems.

**Contaminated packaging**

Containers can be triply rinsed (or equivalent) and offered for recycling or reconditioning. Alternatively, the packaging can be punctured to make it unusable for other purposes and then be disposed of in a sanitary landfill. Controlled incineration with flue gas scrubbing is possible for combustible packaging materials.

---

## SECTION 14: Transport information

### 14.1 UN Number

ADR/RID: Not dangerous goods. (For reference only, please check.)

IMDG: Not dangerous goods. (For reference only, please check.)

IATA: Not dangerous goods. (For reference only, please check.)

### 14.2 UN Proper Shipping Name

ADR/RID: Not dangerous goods. (For reference only, please check.)

IMDG: Not dangerous goods. (For reference only, please check.)

IATA: Not dangerous goods. (For reference only, please check.)

### 14.3 Transport hazard class(es)

ADR/RID: Not dangerous goods. (For reference only, please check.)

IMDG: Not dangerous goods. (For reference only, please check.)

IATA: Not dangerous goods. (For reference only, please check.)

### 14.4 Packing group, if applicable

ADR/RID: Not dangerous goods. (For reference only, please check.)

IMDG: Not dangerous goods. (For reference only, please check.)

IATA: Not dangerous goods. (For reference only, please check.)

### 14.5 Environmental hazards

ADR/RID: No

IMDG: No

IATA: No

### 14.6 Special precautions for user

no data available

### 14.7 Transport in bulk according to IMO instruments

no data available

## SECTION 15: Regulatory information

### 15.1 Safety, health and environmental regulations specific for the product in question

| Chemical name                                                            | Common names and synonyms             | CAS number | EC number   |
|--------------------------------------------------------------------------|---------------------------------------|------------|-------------|
| Bis(2-ethylhexyl) tetrabromophthalate                                    | Bis(2-ethylhexyl) tetrabromophthalate | 26040-51-7 | 247-426-5   |
| European Inventory of Existing Commercial Chemical Substances (EINECS)   |                                       |            | Listed.     |
| EC Inventory                                                             |                                       |            | Listed.     |
| United States Toxic Substances Control Act (TSCA) Inventory              |                                       |            | Listed.     |
| China Catalog of Hazardous chemicals 2015                                |                                       |            | Not Listed. |
| New Zealand Inventory of Chemicals (NZIoC)                               |                                       |            | Listed.     |
| Philippines Inventory of Chemicals and Chemical Substances (PICCS)       |                                       |            | Listed.     |
| Vietnam National Chemical Inventory                                      |                                       |            | Listed.     |
| Chinese Chemical Inventory of Existing Chemical Substances (China IECSC) |                                       |            | Listed.     |
| Korea Existing Chemicals List (KECL)                                     |                                       |            | Listed.     |

## SECTION 16: Other information

#### Information on revision

Creation Date July 15, 2019  
Revision Date August 08, 2025

#### Abbreviations and acronyms

- CAS: Chemical Abstracts Service
- ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road
- RID: Regulation concerning the International Carriage of Dangerous Goods by Rail
- IMDG: International Maritime Dangerous Goods
- IATA: International Air Transportation Association
- TWA: Time Weighted Average
- STEL: Short term exposure limit
- LC50: Lethal Concentration 50%
- LD50: Lethal Dose 50%
- EC50: Effective Concentration 50%
