

# Certificate of Analysis

## Reference Material & Standard

|                    |                                                                                                |                   |                                           |
|--------------------|------------------------------------------------------------------------------------------------|-------------------|-------------------------------------------|
| Product Name:      | Ethiprole Amide                                                                                | Catalogue Number: | C1806714                                  |
| Synonyms:          | N/A                                                                                            | Lot Number:       | 1201-SA-7660                              |
| CAS Number:        | 623151-90-6                                                                                    | Expiry Date:      | Nov 30, 27                                |
| Molecular Formula: | C <sub>13</sub> H <sub>11</sub> Cl <sub>2</sub> F <sub>3</sub> N <sub>4</sub> O <sub>2</sub> S | Storage:          | -20°C±5°C Protected from light and Sealed |
| Molecular Weight:  | 415.22                                                                                         |                   |                                           |

Warning:

Chemical Structure:

| Test Items      | Method            | Results                  |
|-----------------|-------------------|--------------------------|
| Appearance      | Visual inspection | White to Off-White Solid |
| Identification: | LC&HNMR           | Confirmed                |
| Purity:         | HPLC              | 97.727%                  |
| Uncertainty     |                   | ±2.0%                    |

## Comment:

The uncertainty values are the expanded uncertainty and represent an estimated standard deviation equal to the positive square root of the total variation of the uncertainty of components. A normal distribution is assumed and a coverage factor of K=2 is chosen using approximately a 95% confidence level.

## Directions:

1. *Intended use: This product is suitable for identification and quantification of the analyte(s), instrument calibration, method development and quality control in analytical and R&D applications. It is not intended for administration to humans or animals, and shall not be used to diagnose, treat or cure any diseases.*
2. *Minimum sample size: 1mg is recommended as the minimum sample size.*
3. *Metrological traceability: This product meets the requirements of ISO 17034 and is traceable to NMI through an unbroken chain of comparisons.*
4. *Instructions for handling and correct use: Handling in a well-ventilated place.*
