## Reference Material & Standard

|                           |                                                    |                            |                                           |
|---------------------------|----------------------------------------------------|----------------------------|-------------------------------------------|
| <b>Product Name:</b>      | Thalifendine Chloride                              | <b>Catalogue Number:</b>   | C4X-21996                                 |
| <b>Synonyms:</b>          | N/A                                                | <b>Lot Number:</b>         | 0727-RH-0040                              |
| <b>CAS Number:</b>        | 4668-19-3                                          | <b>Expiry Date:</b>        | Jul 27, 2030                              |
| <b>Molecular Formula:</b> | C <sub>19</sub> H <sub>16</sub> NO <sub>4</sub> Cl | <b>Storage:</b>            | 2°C ~ 8°C Protected from light and Sealed |
| <b>Molecular Weight:</b>  | 322.33 35.45                                       | <b>Shipping Condition:</b> | Shipping at Room Temperature              |

Chemical Structure:

| Test Items     | Method            | Results           |
|----------------|-------------------|-------------------|
| Appearance     | Visual inspection | Dark Yellow Solid |
| Identification | LCMS&HNMR         | Confirmed         |
| Purity         | HPLC              | 97.615%           |
| Loss on Drying | TGA               | 0.9957%           |
| Assay          |                   | 96.6%             |

## Comment:

The calculation of the mass balance method follows the formula (calculated on the non-dried basis):

Assay (%) = (100% - Loss on Drying) \* Purity HPLC (%) / 100%

Loss on Drying is considered as absolute effect, HPLC purity is considered as relative effect.
