Comment:

1. Contains 2-Ethyl-6-methylpyrazine.
2. The calculation of the mass balance method follows the formula (calculated on the non-dried basis):
Assay (%) = (100% - Water Content) * Purity GC (%) / 100%
Water Content is considered as absolute effect, GC purity is considered as relative effect.
3. The uncertainty values are the expanded uncertainty and represent an estimated standard deviation equal to the positive square root of the total variation of the uncertainty of components. A normal distribution is assumed and a coverage factor of K=2 is chosen using approximately a 95% confidence level.
