

# Certificate of Analysis

## Reference Material & Standard

|                           |                                                                  |                          |                                           |
|---------------------------|------------------------------------------------------------------|--------------------------|-------------------------------------------|
| <b>Product Name:</b>      | 5-Amino-2-chloro-2,3-dihydrothiazolo[4,5-d]pyrimidine-7-(6H)-one | <b>Catalogue Number:</b> | CCHM703539                                |
| <b>Synonyms:</b>          | N/A                                                              | <b>Lot Number:</b>       | 0128-SA-7979                              |
| <b>CAS Number:</b>        | 30161-95-6                                                       | <b>Expiry Date:</b>      | Jan 27, 29                                |
| <b>Molecular Formula:</b> | C <sub>5</sub> H <sub>3</sub> ClN <sub>4</sub> OS                | <b>Storage:</b>          | 2°C ~ 8°C Protected from light and Sealed |
| <b>Molecular Weight:</b>  | 202.62                                                           |                          |                                           |

Chemical Structure:

| Test Items      | Method            | Results                |
|-----------------|-------------------|------------------------|
| Appearance      | Visual inspection | Light Red to Red Solid |
| Identification: | LC&HNMR           | Confirmed              |
| Purity:         | HPLC              | 97.033%                |
| Uncertainty     |                   | ±2.0%                  |

## Comment:

The uncertainty values are the expanded uncertainty and represent an estimated standard deviation equal to the positive square root of the total variation of the uncertainty of components. A normal distribution is assumed and a coverage factor of K=2 is chosen using approximately a 95% confidence level.

## Directions:

1. *Intended use: This product is suitable for identification and quantification of the analyte(s), instrument calibration, method development and quality control in analytical and R&D applications. It is not intended for administration to humans or animals, and shall not be used to diagnose, treat or cure any diseases.*
2. *Minimum sample size: 1mg is recommended as the minimum sample size.*
3. *Metrological traceability: This product meets the requirements of ISO 17034 and is traceable to NMI through an unbroken chain of comparisons.*
4. *Instructions for handling and correct use: Handling in a well-ventilated place.*
